Introduction to Genetic Testing

What you need to know when ordering a test?

Wednesday, November 25th, 2020

[REGISTER HERE](#)

About the Webinar:

Genetic testing is complex. With so many different technologies and variant types, it can be difficult to know exactly what should be ordered. In this webinar, Dr. Saurabh Bhattacharya will provide an overview of multiple genetic testing technologies and their applications, with a focus on chromosome microarray analysis (CMA) and next-generation sequencing (NGS). The importance of providing detailed clinical information and test quality will also be discussed.

This webinar is intended for individuals who are ordering genetic testing or who would like to refresh their knowledge on genetic testing technologies.

**A Certificate of Participation will be given upon request*

Featured Speaker: Dr. Bhattacharya

Dr. Bhattacharya is National Head of Clinical Cytogenomics at Dr. Lal Path Labs Ltd. He received his Ph.D. from VIT University in Cytogenetics. He completed his training in Clinical Cytogenetics from Christian Medical College, Vellore. He was trained in different Cytogenetics training from Germany and USA. His primary clinical areas of interest are in prenatal and postnatal chromosome and genomic microarray diagnosis; his research interests include the association of neurodevelopmental features with specific copy number changes.
