New GenetiSure Cyto CGH : An improved
design focused on what matters

Register now for the free Agilent Webinar Series

Want to enhance your skills in the Genomics world?

Have an hour to spare?

Join us on Tuesdays for a series of science topics presented by Agilent experts.

Presented by our field scientists, you'll learn tips and tricks to be more successful in your work.

Webinar 5: New GenetiSure Cyto CGH : An improved design focused on what matters

Date: January 25, 2022

Time: 11:00 CET

Speaker: Doug Blake, Agilent Technologies

aCGH technology has become a staple in genetic laboratories. The platform, however, is only as good as the design of the array. Agilent has released the most up-to-date platform design in the Agilent GenetiSure Cyto CGH arrays.

Clinically relevant targets have been updated to incorporate current literature recommendations and a higher resolution in these target regions.

In this presentation, we will review a recent experience of a clinical laboratory that validated these designs for clinical LDT use. We will compare the designs to the older design and review the overall performance characteristics of the new designs.
