Taking Lab Productivity to the Next Level

ORTHO CONNECT™ Version 3.0 is the enhanced lab management solution that meets your needs. Through a single connection, it allows you to control data and metrics, optimize resources and elevate patient care within your lab and across your network.

ORTHOCONNECT™
powered by STRATEC Aurora

Meeting the needs of today's labs

Labs today are facing major pressures:

- ✔ Aging population on the rise
- ✔ Growing test volume & complexity
- ✔ Increasing regulatory requirements
- ✔ Reduced operating budgets
- ✔ Labor shortages
- ✔ Changing healthcare environment

These pressures can create significant challenges. Labs are tasked to do more with less - resulting in the following un-met needs:
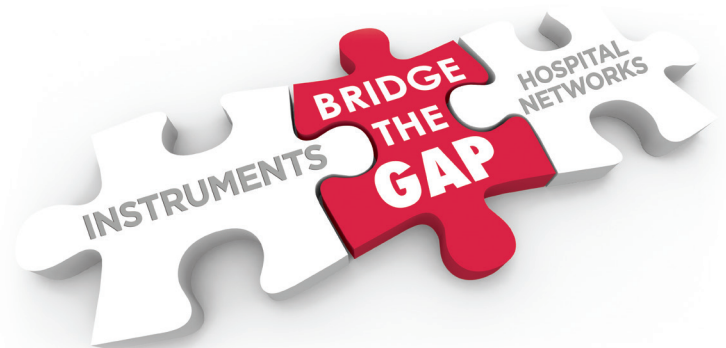

A central and universal solution for QC management
An efficient staff training and allocation process
Solutions to consolidating and integrating new labs
Security of data and routine backup notification
Cross-lab support and monitoring

The right lab management solution can help centralize and streamline your lab operations, providing you with greater access, control and efficiency.
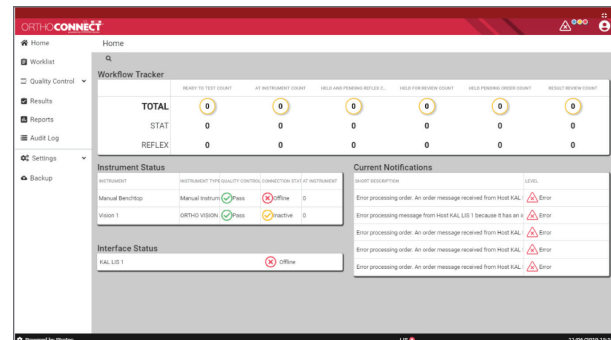

Experience the difference of
ORTHO CONNECT™ **Version 3.0**

Ortho's full portfolio provides a scalable solution that drives integration across your lab and network
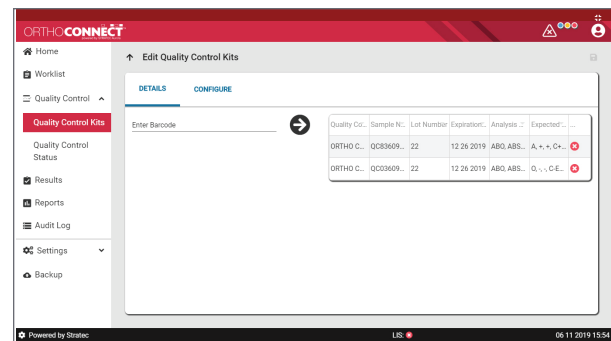

Control your operations by centrally managing data and performance metrics

- **Easily access data from anywhere** in your lab or network through one central portal, on an enhanced dashboard - even if the LIS goes down
- **Ensure consistent behaviors & processes** by automating and enforcing rules across your hospital and network
- **Manage skilled staff shortages** and simplify new-hire training with automated safety checks and approval escalations for complex results
- **Create a seamless flow of information** across your lab & network with multi instrument and LIS connectivity

Optimize resources by standardizing processes and centralizing resources

- **Streamline workflow** and boost productivity by putting your skilled employees where you need them most with centralized tasks
- **Reduce wasted resources** by efficiently managing and reporting QC from a central location
- **Pair with the ORTHO VISION® Analyzer and the ORTHO VISION® Max Analyzer** to consistently deliver timely results even for your most complex patients

Trust that all results are safe and compliant

- **Ensure Standard Operating Procedures (SOP) & regulations are followed and documented** with customized rules engine and definable user rights
- **Reduce errors** related to manual data entry and transcription errors with electronic data management
- **Quickly access historical patient data** to ensure compliance & traceability of all orders and test results through live, searchable database

It all adds up to enhanced lab standardization & efficiency

ORTHO CONNECT™ Version 2.01	ORTHO CONNECT™ Version 3.0
• Terminal-based software application • Customizable rules engine • Order and result edit/management • Profile-based QC management and reporting	• **Browser-based software** provides instant access to orders, results, and instrument status from anywhere in your network • **Improved user interface** provides quick access to centralized worklist, workflow management, QC status and universal search • **Test-based QC management** increases testing efficiency and simplifies planning • **Audit trail, automated real-time backups, and result traceability** – ensuring the safety of patients and practices

Ortho Clinical Diagnostics' transfusion medicine solutions help you deliver the **right results** to the **right patient** at the **right time**, every time.

✓ **An integrated suite of products** that brings you the next generation of automation and lab management solution that keeps it all connected

✓ **Training and education** that gives you personalized instruction on your terms and at your convenience

✓ **Support services** that do more than help solve problems – they help prevent them
