

Seahorse User Meeting 2023

Date and time: 11th of October 2023, from 9:00

Location: Institute of Physiology CAS, Vídeňská 1083, Prague 4

It is our pleasure to invite you to Seahorse User Meeting 2023 which is traditionally organized by Altium International (formerly known as HPST) in cooperation with Institute of Physiology CAS. The user meeting will be focused on practical knowledge and experience with Seahorse technology, news in this area and troubleshooting part. We will listen to the interesting lectures from Seahorse users and share or learn the valuable advice. The second part includes a „hands-on“ experiment on Seahorse XFe24 Analyzer. We believe that the purpose of such an event is to bring users together, learn new information and enjoy the presence of colleagues from the area.

We are looking forward to enjoy this event together.
